Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from *The Descent of the Primates: Lectures Delivered on the Occasion of the Sesquicentennial Celebration of Princeton University* For a student of natural history, be he a zoologist or a botanist, the examination of the external characters of animals or plants is generally the first step by which he acquaints himself with the objects of his study. Next comes the investigation of their internal fabric, of their organs and of their tissues; finally, the yet more laborious unravelling of their development. The slow and numerous steps by which these organs and tissues have come into being are always identical; they lead on from a simple fecundated egg-cell to the complexity of the adult animal or plant. In this way embryology throws a welcome light upon questions which anatomy alone would not enable him to solve. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
