

Make - Getting Started with RFID: Identifying Things with Arduino and Processing

Filesize: 2.07 MB

Reviews

It is an awesome book that we have possibly go through. It is actually writter in straightforward words and phrases and not confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.

MAKE - GETTING STARTED WITH RFID: IDENTIFYING THINGS WITH ARDUINO AND PROCESSING

O'Reilly Media, Inc, USA. Paperback. Book Condition: new. BRAND NEW, Make - Getting Started with RFID: Identifying Things with Arduino and Processing, Tom Igoe, Just as we identify things using information from our senses, so do computers. They can identify physical objects only by using information from their sensors. One of the best-known digital identification techniques is radio frequency identification, or RFID. The RFID tag pasted on the side of a book may seem like a universal marker, but what it means depends on who reads it. Based on the projects from the first edition of Making Things Talk (from the same author), this book shows you how to create projects with Arduino, Processing, and the Getting Started with RFID kit from Maker SHED to identify physical objects.
